DETAILED ACTION

Election/Restrictions

Applicant's election of Claims 1-11 and 17-22 in the reply filed on 25 September 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Objections

Claims 1 and 17 are objected to because of the following informalities: They lack a preamble. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-11 and 17-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Lawman, US Patent No. 5,946,478.

In regards to claim 1, Lawman teaches a method comprising storing a first signature (Figure 4, Macro Bitstream), receiving a second bitstream (Figure 4, User Bitstream) and altering the second bitstream to generate an altered second bitstream (Figure 4, Completed Bitstream).

In regards to claim 2, Lawman teaches wherein the CRC of the second bitstream is updated to match (Figure 4D).

In regards to claim 3, Lawman teaches wherein the bitstreams configure different portions of the programmable device (Figures 4A and 4B).

In regards to claims 5-10, Lawman teaches wherein the signatures are generated using CRCs (column 7, lines 38-53).

In regards to claim 11, Lawman teaches programming a PLD with the bitstream (Claim 1, step D).

In regards to claims 17-22 drawn to computer readable media for performing the method as rejected in claims 1-11 above, the same rejection applies.
